POTENTIAL INTERVIEW QUESTIONS

(10-15 min)

Alexey mentioned that interview questions are good if they're targetting behaviours that the users are currently doing; for instance:

Introductory:
- What are you studying right now?
- Was there any part of the survey that you wanted to provide more information about?

Frequency:
- How many positions did you apply for last time you were "job-hunting"?
- How frequently do you update your resume to fit a new job you're applying for?
- How many work term did you take till now? (one work term = four months)

Behaviour-oriented Questions:
- "What is the current process you take to preparing you resumes for job applications?"
- "What applications or tools do you use?"
- How many version of Resume do you have?
- What applications do you use to save them?(OneDrive, Dropbox, Google Doc, iCloud,or your own PC)
- How do you feel about resume writing?
  - What about resume writing makes you feel that way?

Interests and Expectations:
- What is the main function you intend to see when you use a resume application/website?(Easily upload, One buttom print)
- What do you expect from a resume management system?

Privacy-oriented questions:
- "What assurances would you need before feeling comfortable inputting personal information into a web-based application?"
- Which kind of privacy protection do you want when you unlock your resume account? (finger-print, password, facial recoginition, voice recoginition, or combined any two of them)

Ethics required questions:
- Are you comfortable with us using your responses to this survey for the purposes of our project? Your name and other personally identifiable information will be kept anonymous.

DRAFT

Expectation

       what do you expect for your resume?

Basic info:

how many versions of resume do you have?

Where do you save them? Save in online drive? Save in personal computer? etc

How do you write it? Using sample? or write on your own?
